The DESSA System is a suite of evidence-based screeners and assessments that focuses on identifying the critical social, emotional, and behavioral skills that students need to engage in impactful learning.

The DESSA System includes:

- 1. The Devereux Student Strengths Assessment (DESSA) Suite, including the DESSA-mini universal screener and DESSA assessments administered by Educations for K-12 students, and DESSA Student Self Report for Grades 6–12.
- 2. DESSA Strategies and Interventions Package, a research-based, CASEL-aligned, grand-banded SEL supplemental curricula for Grades K–12 which offers Universal Strategies and Advanced Tier Interventions to guide tiered instruction and interventions.

*"Teaching doesn't happen until love and respect happen in the classroom. And I'm grateful for this program and all of these different strategies that help develop that and give us the data to back it up. Over the course of 2 years, our pilot schools reported that referrals had been cut in half and out-of-school suspension assignments had been reduced by 76%."*

\*Text colors should only be limited to either *White* or *Jet*

\*Background colors should only be limited to either *Navy* or *Off-white* (or *White* for print)

\*Only used as accents (e.g visual elements, buttons, etc)

# COLORS

To the right are all the primary colors for Move This World. Green, Blue, Orange, and Yellow make up the Move This World logo. White is used primarily as a background because that color makes the Move This World logo the most legible. Green, Blue, Orange, and Yellow can be used as accents, callouts, or solid forms of colors as design elements.

Each of the Move this World logo colors has a spectrum of tints and shades that can used for digital purposes when applicable. Examples of use cases would be a hover state for a button, gradient, and accents.

Neutral colors like grey and black can be used for copy and accents.

# Design Direction

- Example:
- Use linear elements minimally and only in *Jet*
  - Experiment with scale (small vs. large) with primary and secondary shapes
  - Leave room for negative space

- Example:
- Scale shapes to create more negative space or containers to hold text and create visual interest
  - Center elements to create focus on important information

- Example:
- Experiment with scale (small vs. large) with primary and secondary shapes
  - Ensure negative space so as to avoid clutter
  - Center elements to create focus on important information

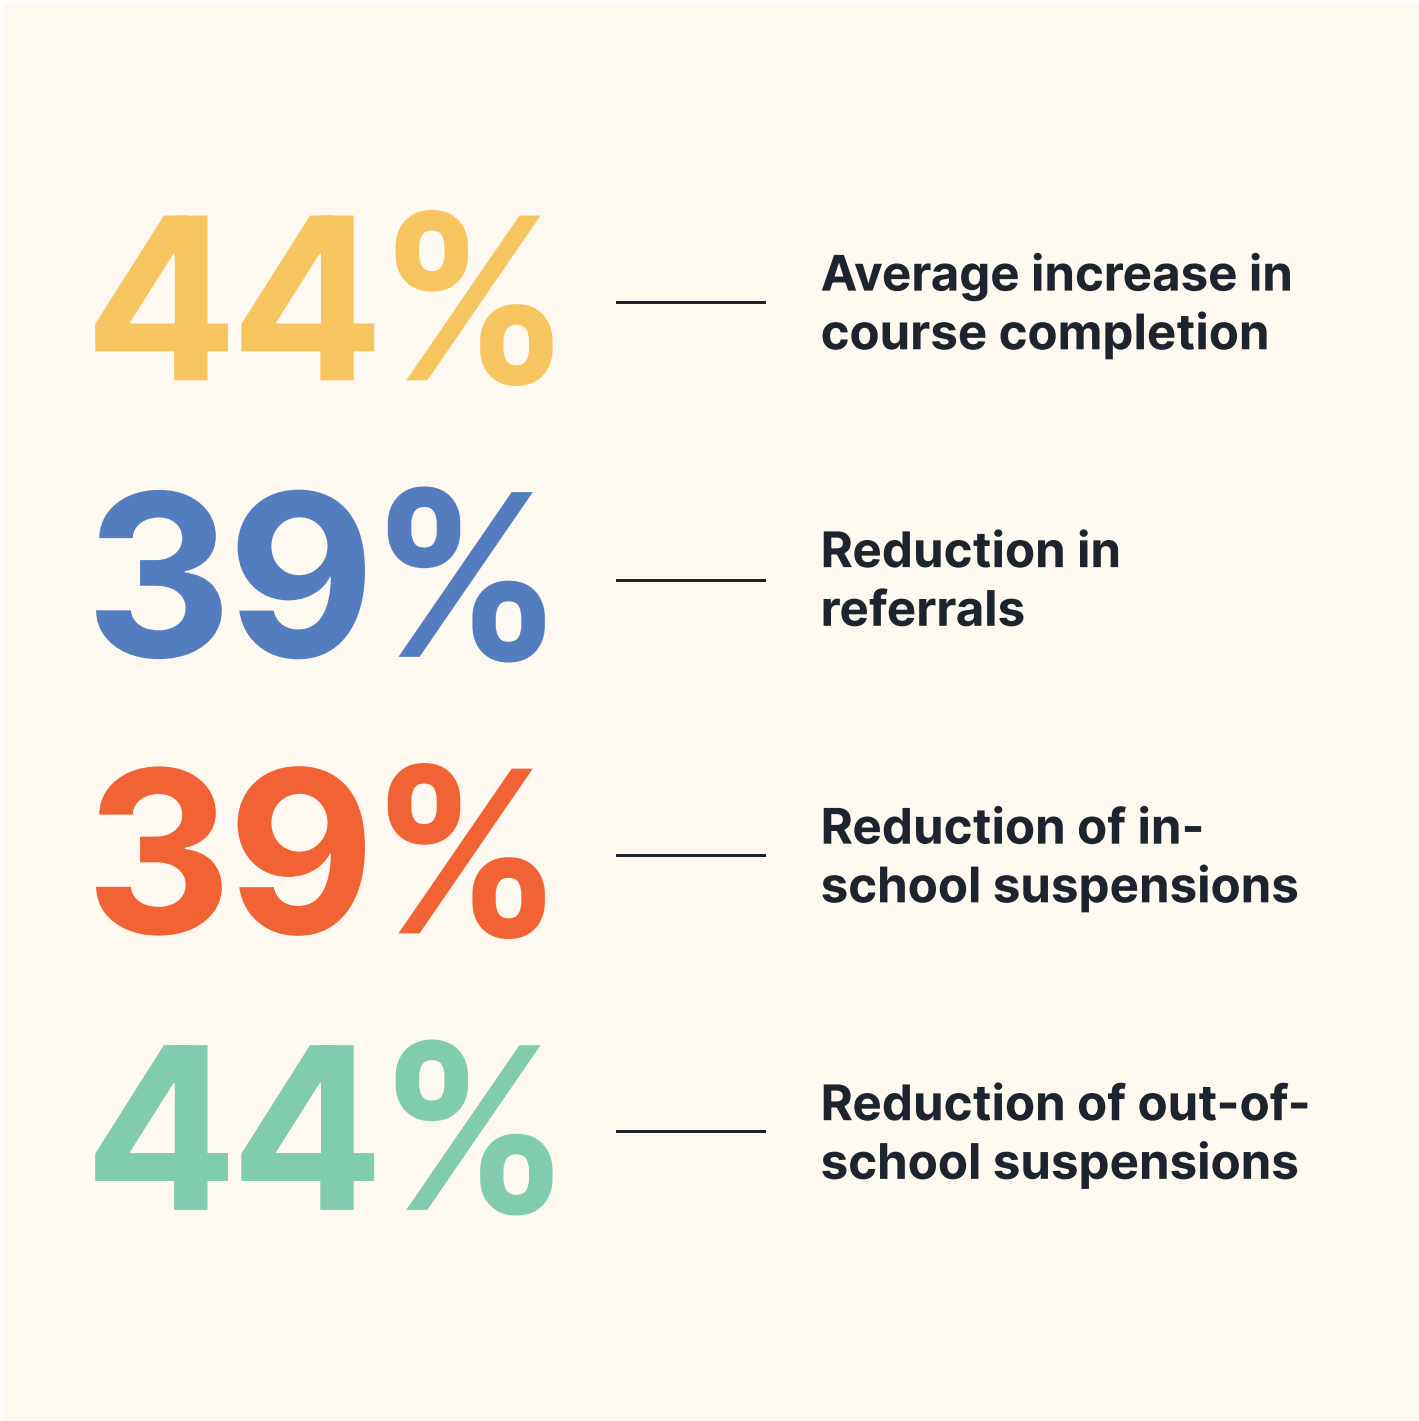

- Example:
- Use linear elements minimally and only in *Jet*
  - Use primary shapes as containers for text
  - Overlay shapes on top of images to create accents

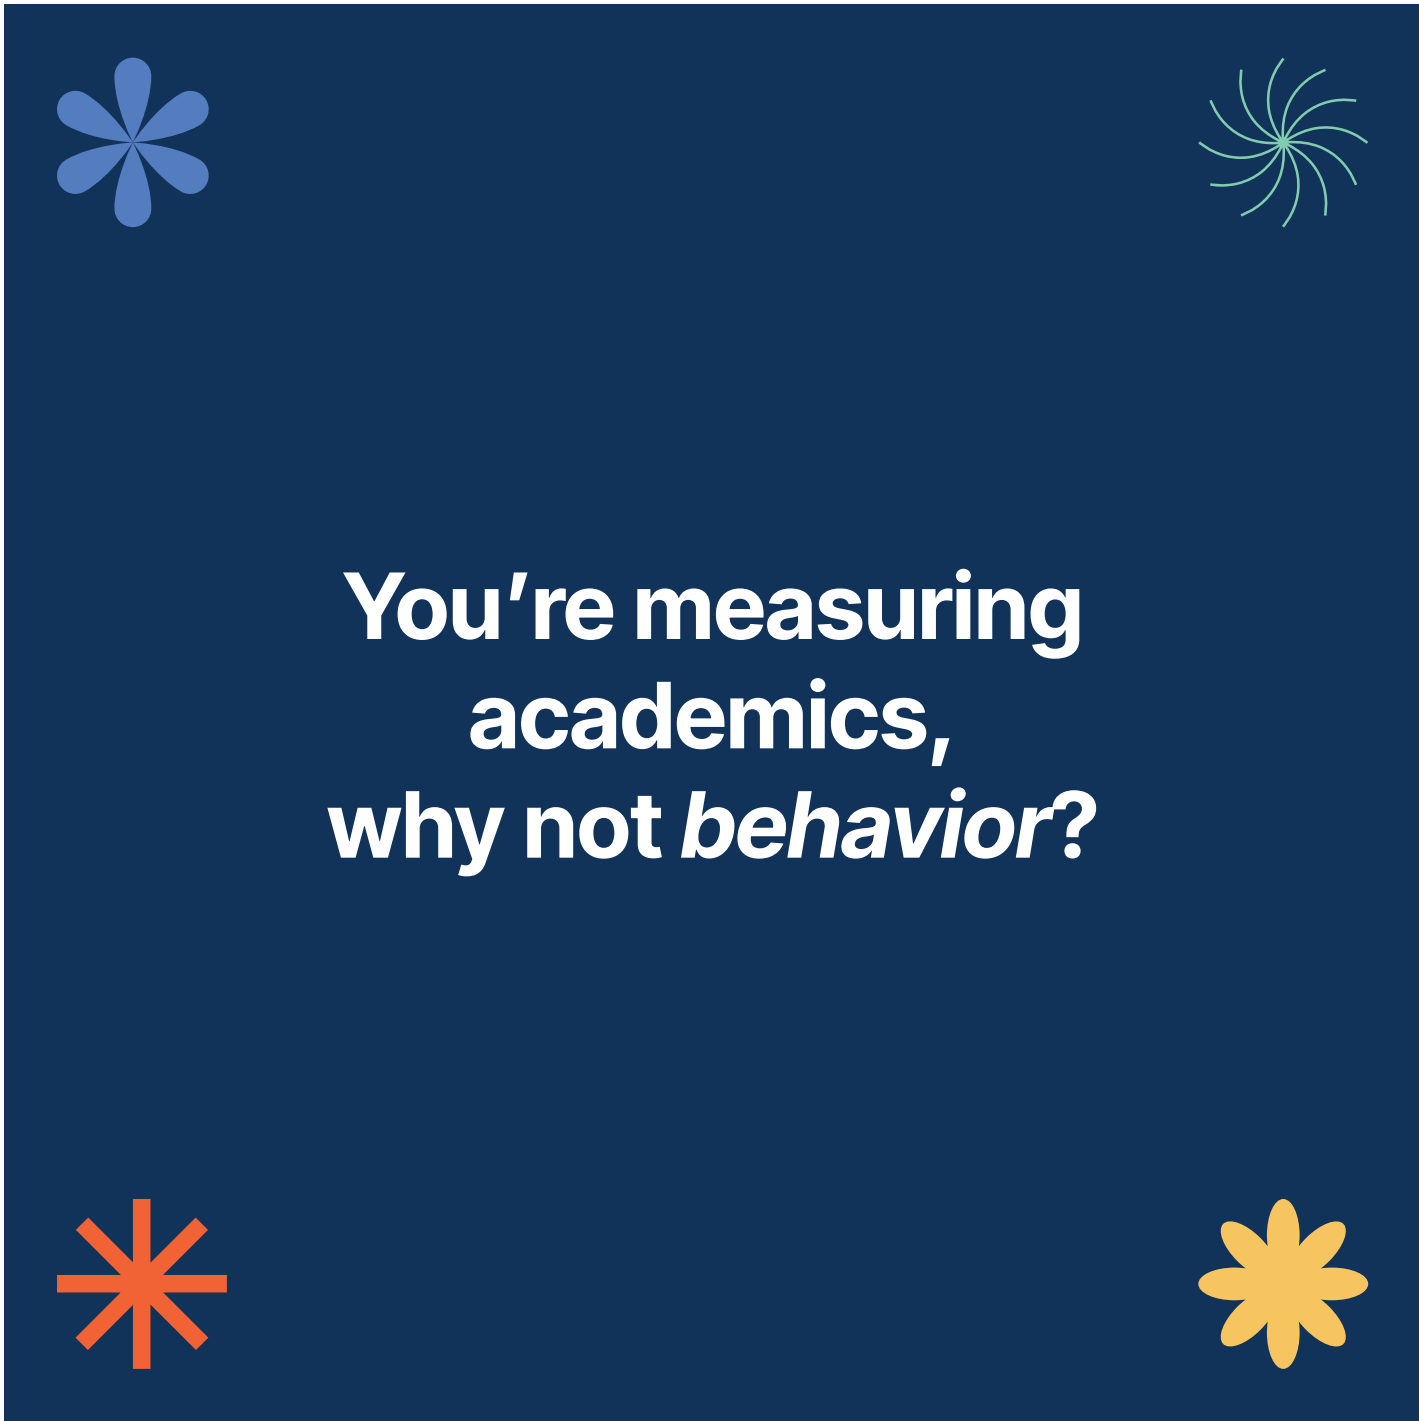

- Example:
- Use primary shapes as masks for images to create more visual interest
  - Layer shapes and linear elements as accents
  - Ensure negative space so as to avoid clutter

- Example:
- Use primary shapes as masks for images to create more visual interest
  - Experiment with scale (small vs. large) with primary and secondary shapes
  - Layer shapes and linear elements as accents

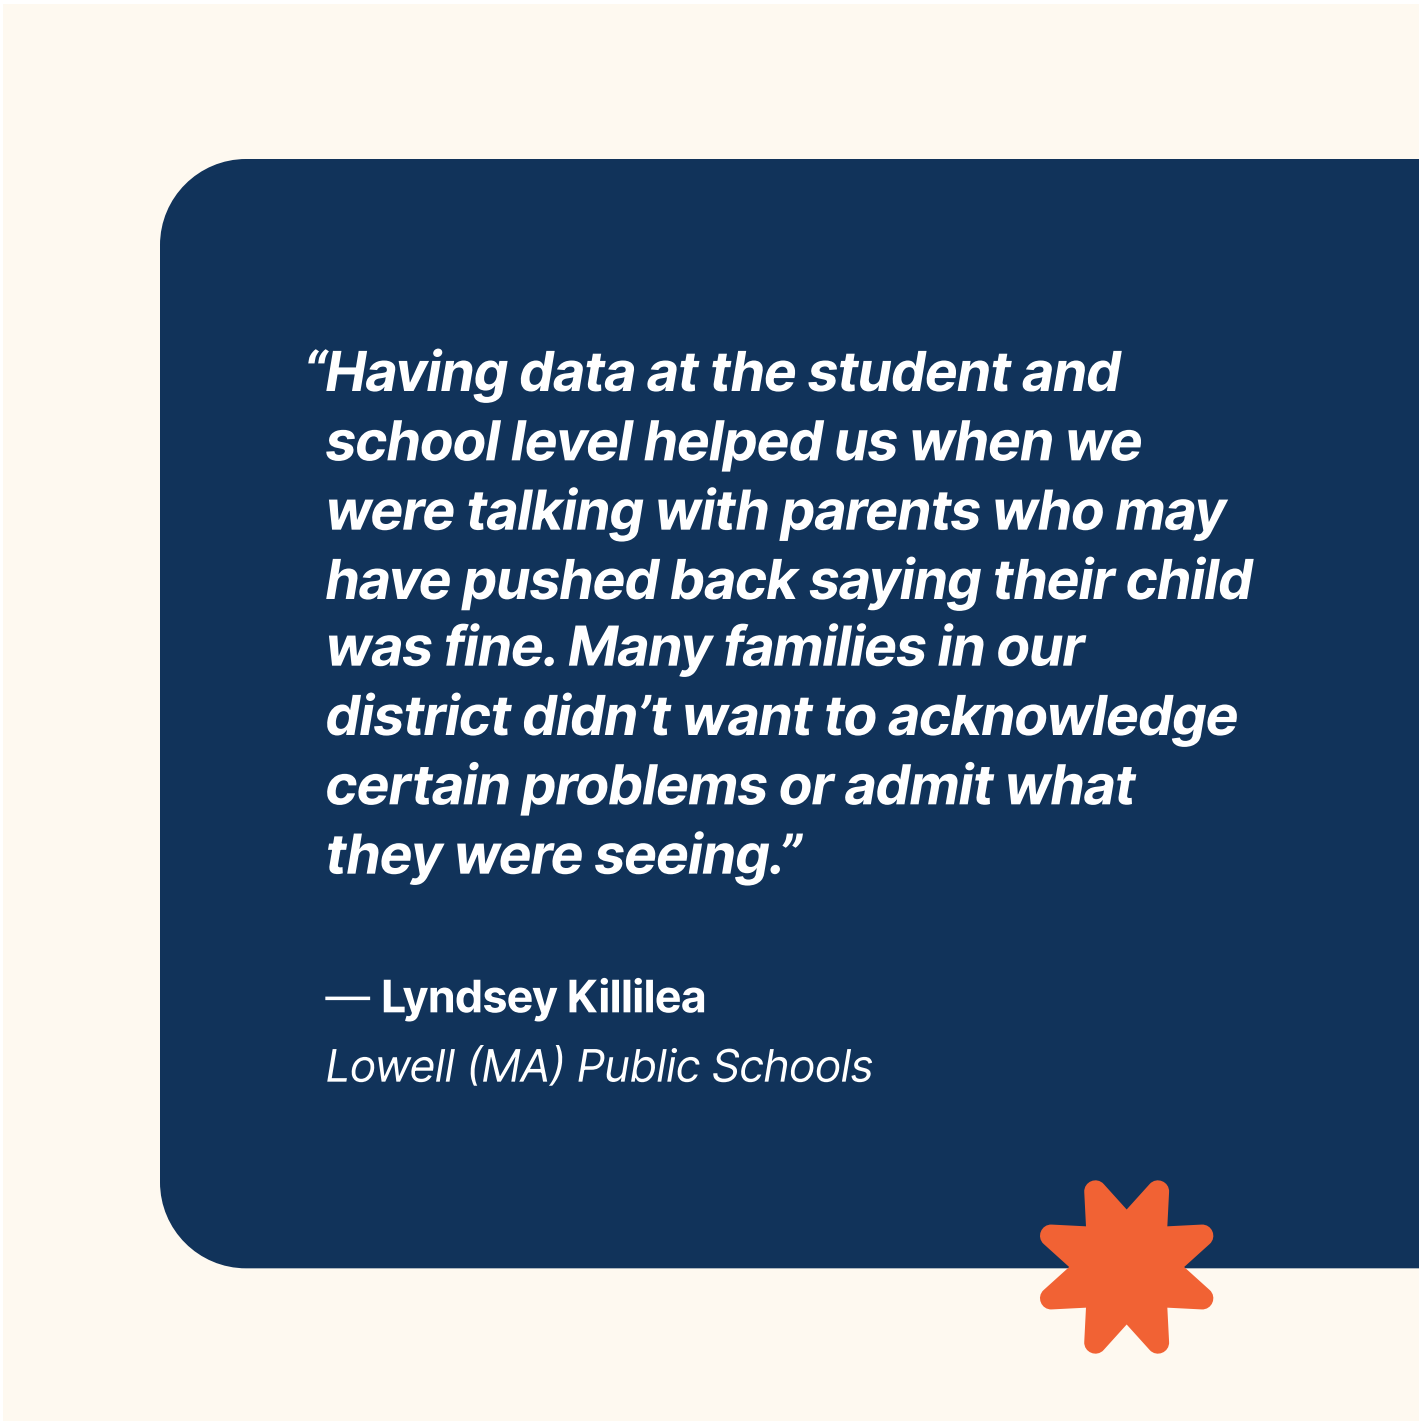

- Example:
- Numbers/statistics can be scaled and used in color to create more visual interest (all other texts should be used in *Jet*)

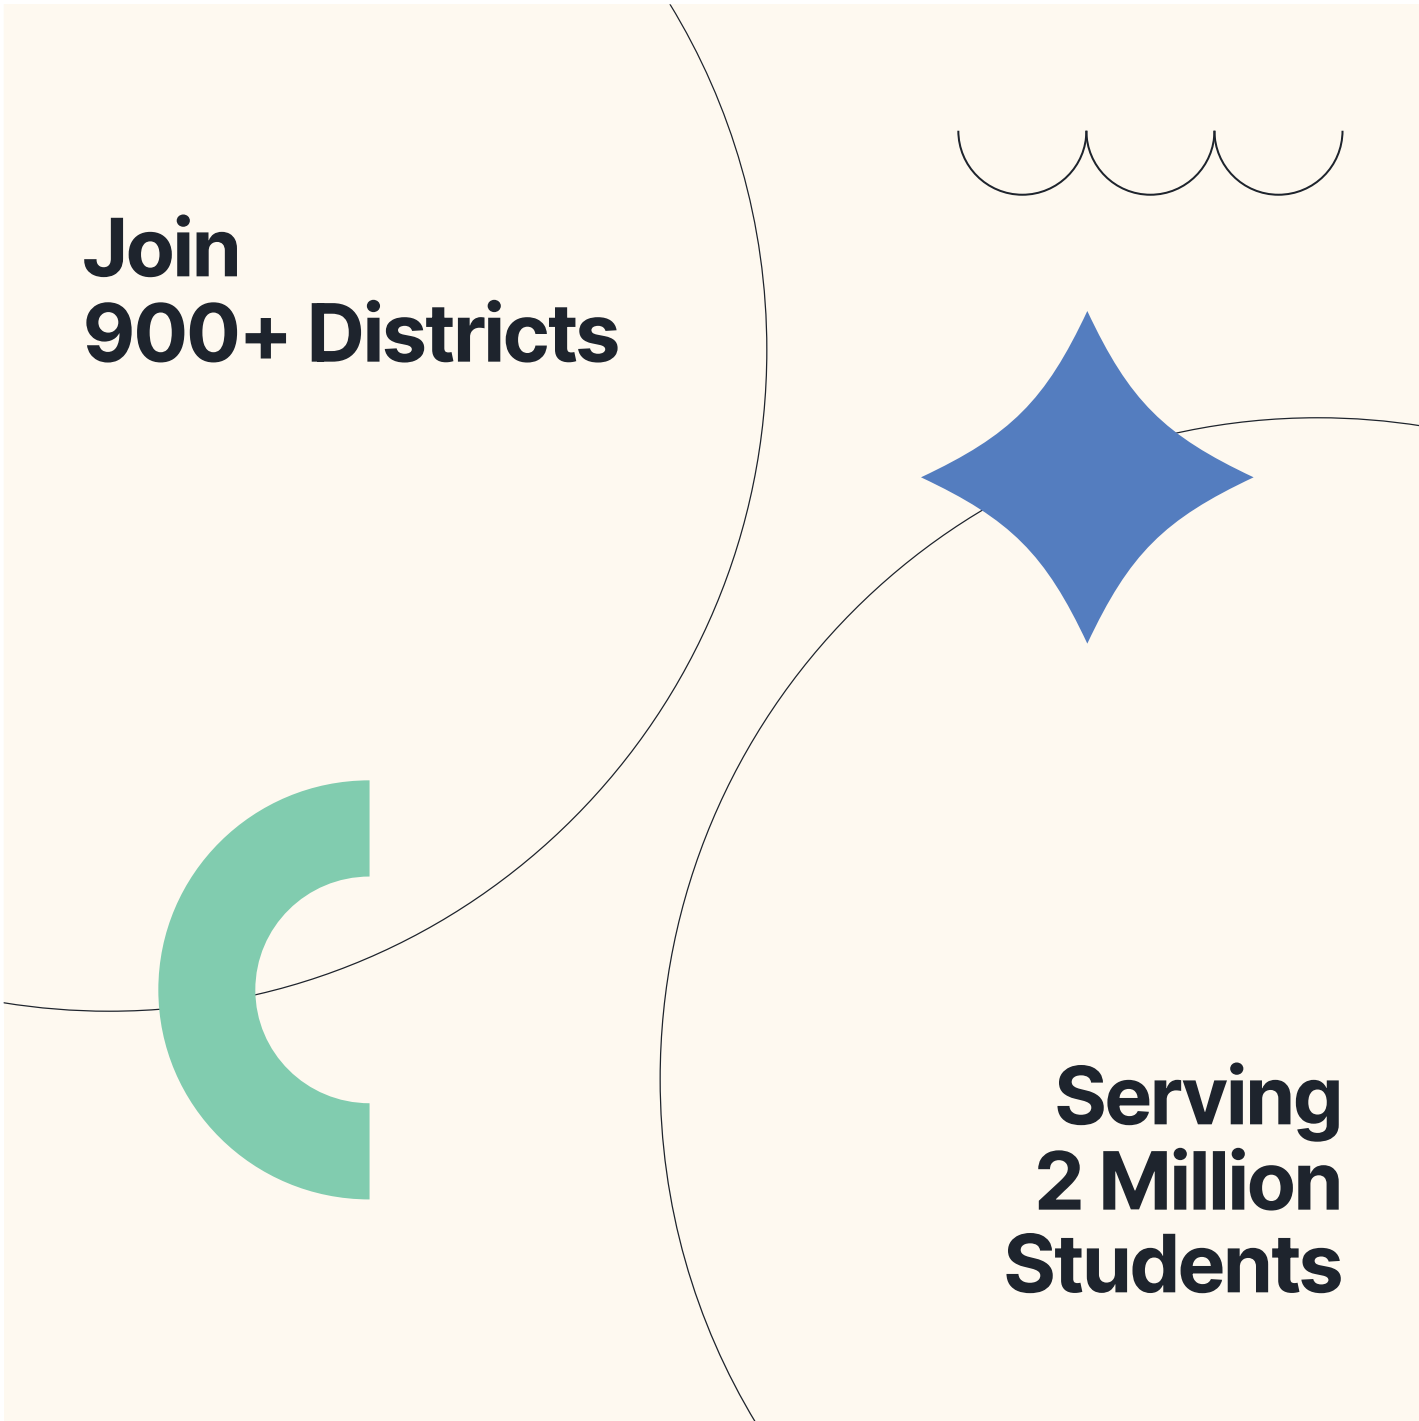

- Example:
- Center elements to create focus on important information
  - Shapes can be used as accents
  - Keep layout simple

- Example:
- Colors used in iconography should be limited to a maximum of two colors (accent color + background color; or one solid color)
  - Icons can be create by layering and combining primary + secondary shapes

- Example:
- Scale shapes larger to create more negative space or containers to hold text and create visual interest
  - Scale shapes smaller to use as accents

- Example:
- Use linear elements minimally and only in Jet
  - Primary shapes can also be scaled large and set in an outline to be used as containers to hold text
  - Scale shapes smaller to use as accents

- Example:
- Scale shapes larger to divide up the space and add more visual interest
